

SecureConnect

Part of the Fukuda Connexus Suite

Improving the Care Continuum

Anytime, Anywhere...

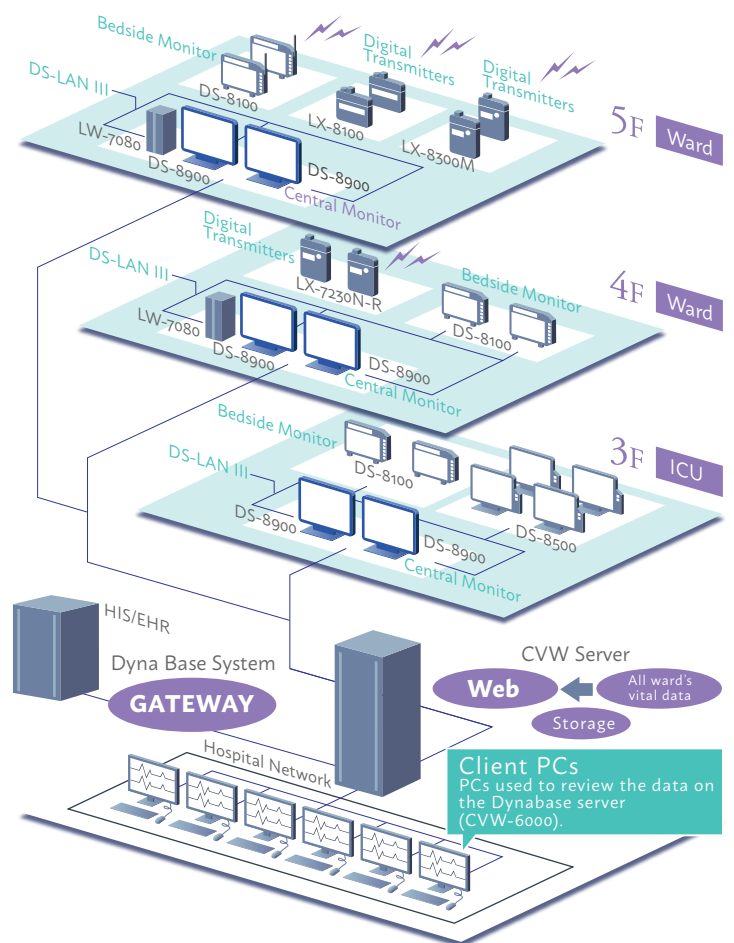

Scalable Architecture

SecureConnect scales up to meet increased workloads no matter the demand of the system. It's designed with multi-level deployments to support various system infrastructures, be it on-prem or virtual. Fukuda's built in a tolerant network, while orchestrating our dynamic system integrations, that will allow continuous implementations throughout various hospital systems, regardless on company size.

Multiple Servers Configuration

32 central stations	512 beds
1024 waveforms	ALL parameters

DynaBase CVW

Securely access patient vitals, anywhere, anytime seamlessly from any local or remote PC/Tablet/Mobile Device.

Unlimited number of clinical users to access patient vitals to respond quickly and effectively to increase clinical outcomes.

Individual patient bedside selection allows for proactive patient monitoring via desktop PC to quickly review patient cases.

* Designed for reviewing only, not for monitoring patients or alarms

DISPLAY PATTERNS

- Zoom
- Full Disclosure Display
- Event Recalls
- Tabular Trend
- Graphic Trend
- Vitals & Patient Admission

USER EVENT

Add user events to leave comments at any time. It is displayed on the event recall screen.

EVENT SEARCH

Utilizing extended full disclosure allows for retrospective analysis on events which are searchable to find specific events or changes on patients over 24 hours.

SecureConnect

Fukuda's agnostic EMR connectivity solution delivers clinical data in a standardized, secure and efficient manner with HL7 interfacing capabilities. This allows for comprehensive integration between Fukuda's patient monitoring systems and various enterprise information systems.

Fukuda DSS

Expansive "full disclosure" data storage for longer retention of patient vitals and waveforms. Allows clinical studies, and clinical informatics with the Fukuda DSS + Fukuda Monitors.

SecureCare

The Secure IT Suite empowers you with dynamic data insight for security of patient monitoring.

- HIPAA Compliance
- Data Analytics
- Simplified Integration
- Robust Audit Reporting
- SecureCare Command Panel
- Proactive Detection
