

Medical Innovation for a Brighter Tomorrow

Company Profile 2025

Medical Innovation for a Brighter Tomorrow

We always listen to the voice of the medical staff while caring about the real needs of patients. Through this approach, we are able to develop innovative medical solutions that only we can provide. We will continue our commitment to providing reliable, safe and comfortable solutions.

Message from Management

Kotaro Fukuda

Chairman of the Board of Directors

The development of the first electrocardiograph in Japan was the first step for Fukuda Denshi. Since then, Fukuda Denshi has contributed to the advancement of medical science, while also meeting the demands of social reform and continuously combining the growth of technology with the power of the human element. Fukuda Denshi, a manufacturer specializing in medical devices, continues to face challenges based on our more than 80-year history. With the trust of society, we will continue to develop medical innovations that contribute to health of humanity.

Daijiro Shirai

President and Representative Director

It's crucial that people trust us as a manufacturer of medical devices. This, in our opinion, is built through experiencing the quality of each and every one of our products and how beneficial they are for patient health. Fukuda Denshi will carry on being an innovator and a challenger who can meet with societal changes and expectations. By finding the actual needs for the medical environment, we will strive to be a "Centennial Company", while making a positive impact on the progress of medical science.

Customer First

Since its establishment in 1939, the Fukuda Group has continuously advanced alongside the development of medical technology in Japan. Over time, medical devices and systems have become increasingly sophisticated and complex.

However, one principle has remained unchanged: our commitment to "Customer First".

The trust we have earned from our customers stems from this unwavering spirit and dedication, which continue to define our business today. As we move forward, we remain committed to our social mission, striving to contribute to the advancement of medical science and the improvement of human health through our innovative medical devices.

Management Philosophy

- Committed to our social mission, we contribute to the advancement of medical science through the development of medical devices
- Striving to become the world's leading manufacturer of electrocardiographs
- The Fukuda Group pursues shared goals as a united community
- Supporting employees in their self-improvement and personal growth while fostering a fulfilling and prosperous life.

History

The oldest existing Japanese-made electrocardiograph

1935

Developed Japan's First Electrocardiograph

Tadashi Fukuda, the older brother of our company's founder Takashi Fukuda, is the one who developed and manufactured Japan's first domestically produced electrocardiograph in 1935.

1939

From the Foundation to the End of World War II

In 1939, Fukuda Special Medical Electric Manufacturing, the predecessor of Fukuda Denshi, was found.

1953

The Formation of the Nationwide Fukuda Brand

In 1953, Fukuda Denshi laid the foundation for nationwide expansion by gaining medical recognition for its high-performing AC electrocardiograph and direct thermal writing electrocardiographs, leading to the establishment of sales locations in major cities across Japan.

1992

The Beginning of Medical Homecare

Our company actively engaged in developing medical devices in fields other than just cardiac and circulatory systems. We established the Home Oxygen Therapy division which dedicated to oxygen enrichment medical homecare.

A Lifetech building specializing in home oxygen therapy support

1994

Global Expansion of the Fukuda Brand

With the business aim of global expansion, the Fukuda Denshi Beijing office was established in Beijing. In the same year, Fukuda Denshi USA and Fukuda Denshi UK were established to strengthen the acquisition of market shares in the United States and Europe.

Origin of the Company Logo

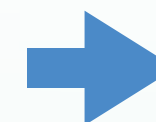

In modern times, electrocardiograms are recorded by attaching electrodes to the chest, hands and feet, but in 1903, when the world's first electrocardiogram was recorded by the Dutch physician Einthoven, the electrocardiogram was measured at three points: the right hand, left hand, and the left foot.

This theory is called the "Einthoven's Triangle" and is the basis of electrocardiography.

In fact, this Einthoven's Triangle is hidden in Fukuda Denshi's logo in addition to the initial letter "F" from "Fukuda".

PTE LTD.

Different nations around the world have diverse cultures, living environments, and medical conditions. However, people everywhere share the same aspiration: to live a long, healthy, and active life. To support this, we have expanded our sales and maintenance operations overseas. In the 1980s, we launched full-scale business development at our international locations. Today, we have established four key bases in China (Beijing), the U.S. (Seattle), the U.K. (Sheffield), and Asia-Pacific (Singapore), and we are recognized for providing high-quality products driven by cutting-edge technology.

The Fukuda brand is introduced to medical professionals worldwide through conferences, exhibitions, and other events. As we continue to expand globally, we are committed to building a system that delivers products and services tailored to the needs of each region in a timely manner, anticipating the growing demand for medical equipment across the world.

Product & Solutions

Flexible healthcare solutions you can trust.

We're proud to build the healthcare industry's most adaptable devices and software, delivering reliable, life-saving data day after day, all at the lowest cost of ownership in the market.

Patient Monitoring

Fukuda's flexible patient monitoring solutions are designed to fit the way you work in your hospital or healthcare facility.

Diagnostic Cardiology & Vascular

At the press of a button, our diagnostic tools deliver robust, accurate data that will drive faster, smarter decisions at the point of care.

Digital Health Solutions

No system in your facility stands alone - our software and hardware solutions seamlessly and securely integrate Fukuda systems into your existing workflow, including EMR integration, remote access, data storage, and more.

Veterinary Hospital

This innovative veterinary suite empowers veterinarians to deliver exceptional care throughout all stages of patient treatment.

Sustainability

Guided by our philosophy of contributing to medical progress through innovation, the Fukuda Group is committed to supporting both healthcare professionals and the patients they serve. Our mission is to help create a world where people everywhere can live healthy, fulfilling lives.

To keep this mission alive, we must continue to engage sincerely with all stakeholders—listening closely, understanding their needs, and delivering real value. It’s also vital that we remain a trusted presence in society, now and in the future.

Even as the healthcare landscape evolves, every Fukuda employee shares a common purpose: to meet society’s expectations and improve lives. Grounded in our “Customer First” mindset, we strive to solve real-world challenges with thoughtful, high-quality medical devices and services—working toward a future that’s both socially and environmentally sustainable.

Quality Management

Fukuda enhance its manufacturing technology to continue to maintain outstanding quality of its products with minimal impact on the environment.

Since its foundation, Fukuda has been dedicated to delivering the highest quality and therefore operates a strict quality control system. In recent years, as people have become increasingly safety-cautious concerning medical treatment, Fukuda has drawn up plans to broaden and reinforce its quality control system, basing its own quality system on the Zero Complaint Concept.

ISO 9001 / ISO 13485

ISO 9001 is a recognized international standard that specifies requirements for a quality management system, from design and development to production, inspection, shipping and servicing of a product, established by the ISO (International Organization for Standardization).

And in addition, ISO 13485 is a recognized international standard that specifies requirements for a quality management system of medical devices, which is widely involved in legislation in various countries in the world.

Fukuda have obtained certification of ISO 9001 in 1995, and ISO 13485 in 2003 through the British Standards Institution (BSI). We have also been focusing on establishing an international quality management system, such as by obtaining certifications based on the European Medical Device Directive (93/42/EEC), and the Canadian Medical Devices Conformity Assessment System (CMDCAS). Under our quality policy, we continue to work for quality assurance activities with strict standards, putting effort into the development of products that are trusted by all our users.

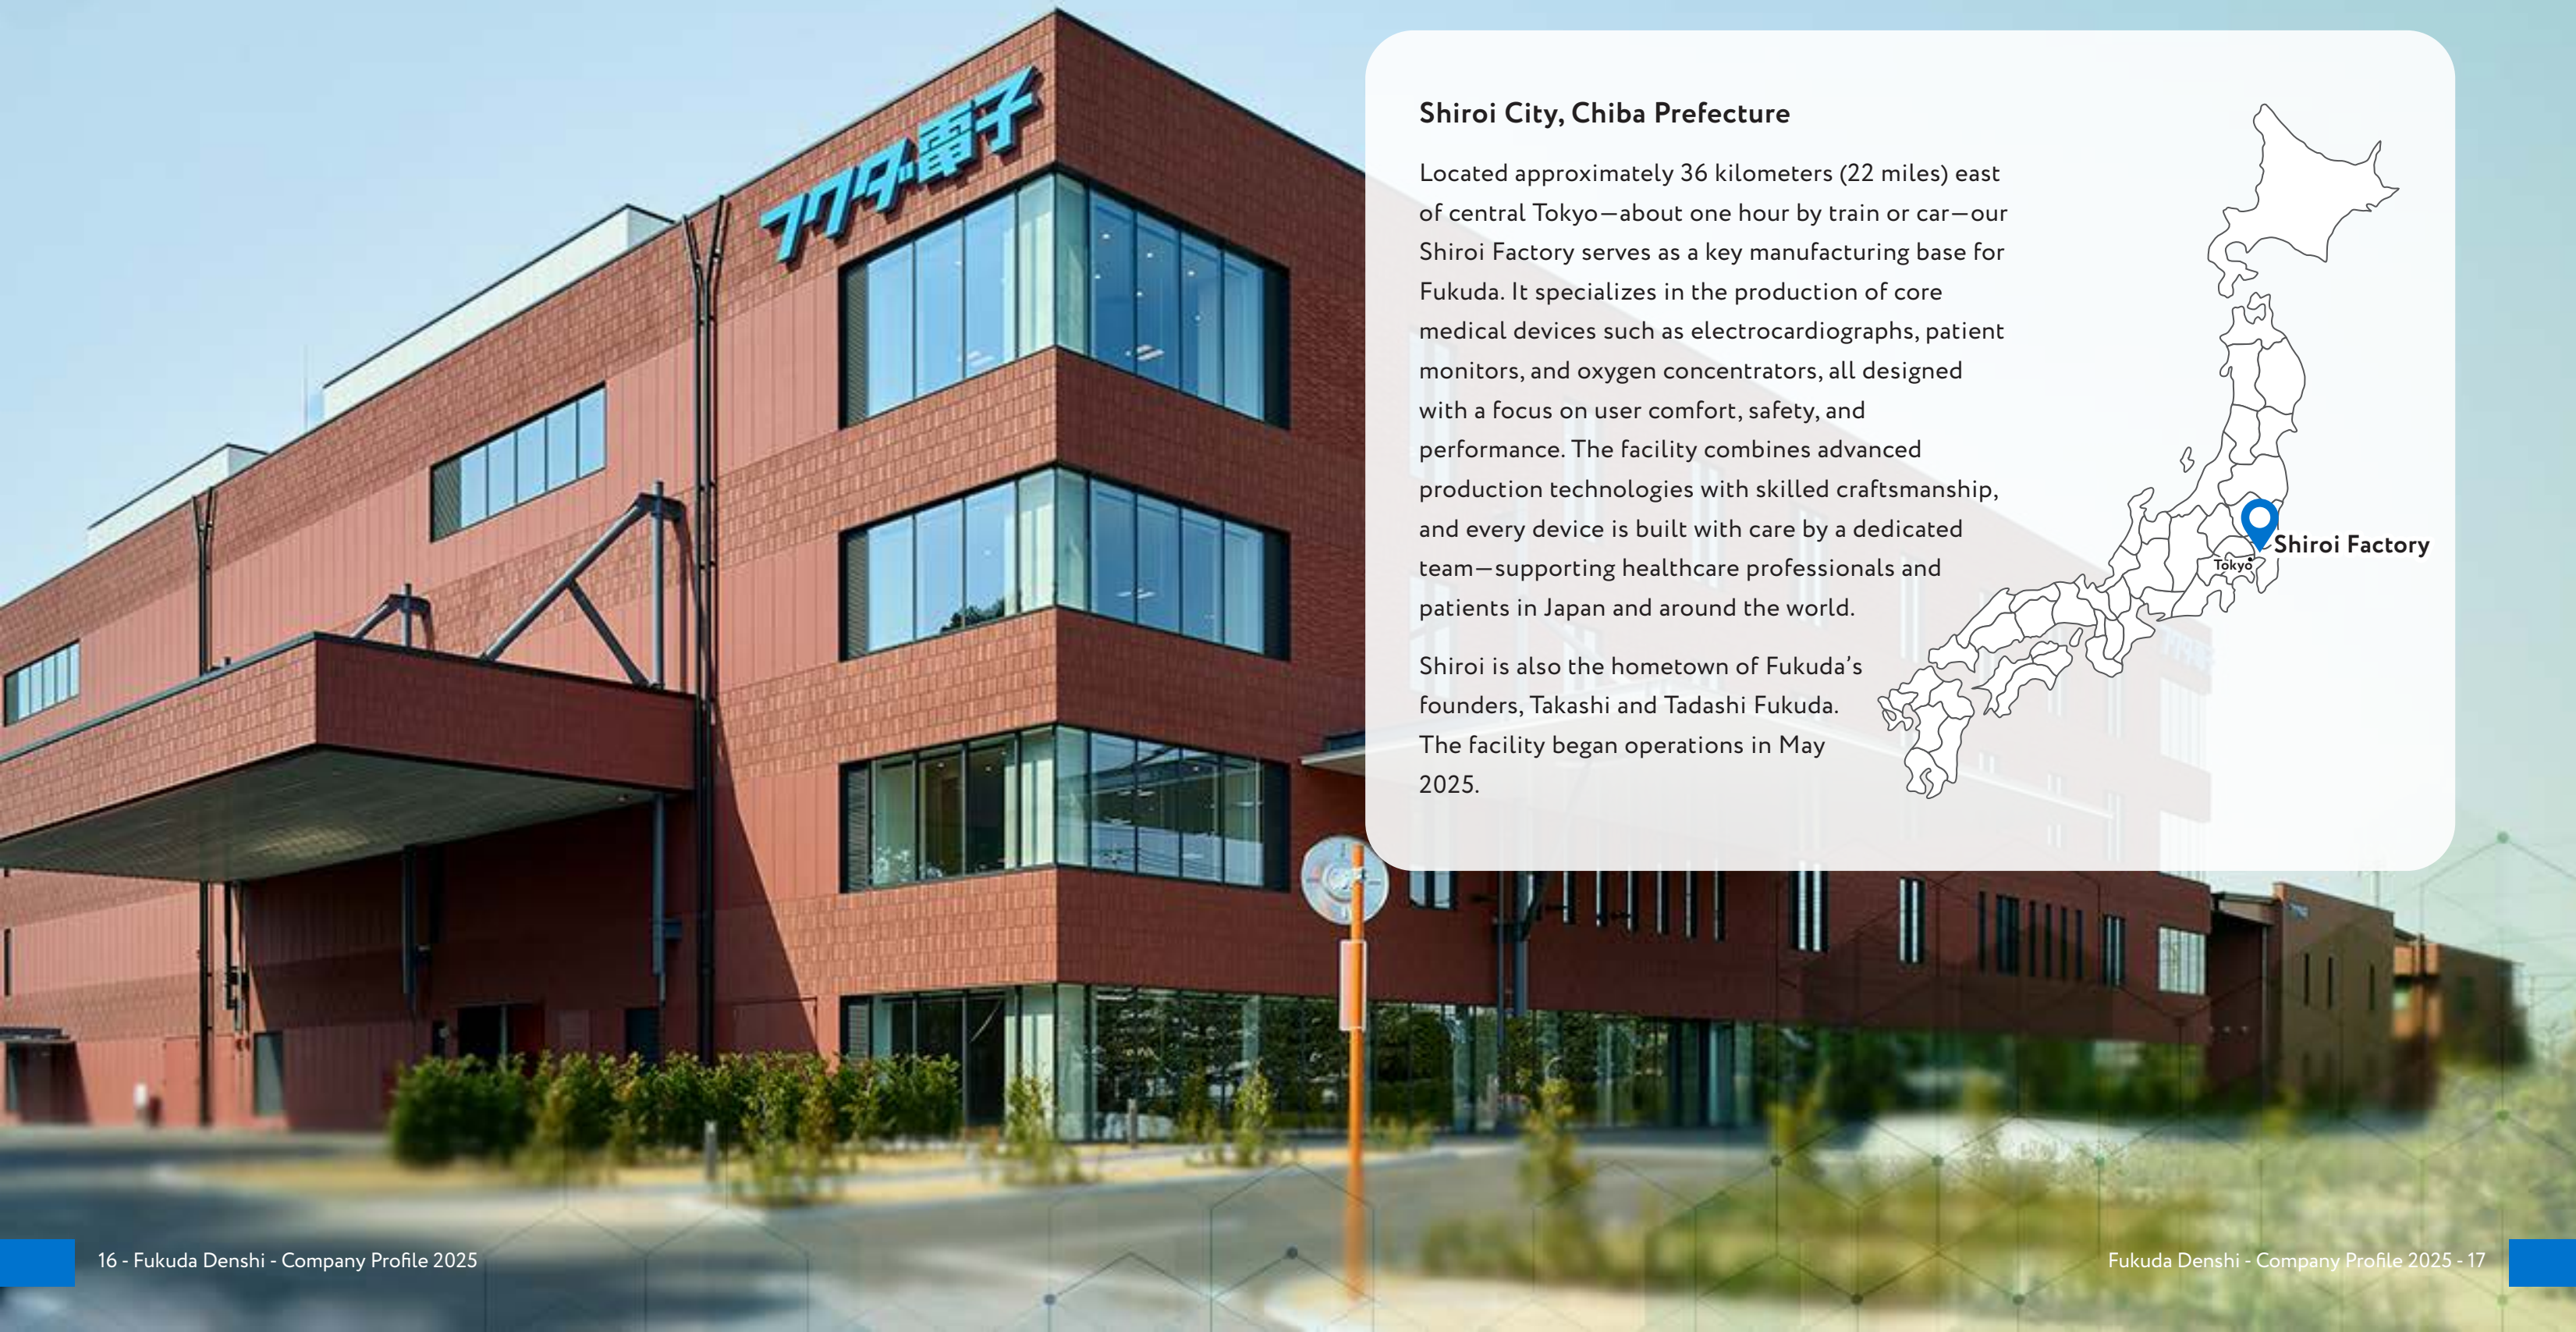

ISO 14001

Fukuda Denshi Shiroi factory have obtained certification of ISO 14001:1996, in June 2003. We have been performing activities based on ISO 14001 (a recognized international standard that specifies requirements for an environment management system) as part of the approach to reduce environmental burdens arising from industrial activities and to protect the environment. We will continue to perform environmentally-friendly activities based on our environmental policy.

Shiroi Factory

- Dedicated to “People-Friendly Product Development” -

Shiroi City, Chiba Prefecture

Located approximately 36 kilometers (22 miles) east of central Tokyo—about one hour by train or car—our Shiroi Factory serves as a key manufacturing base for Fukuda. It specializes in the production of core medical devices such as electrocardiographs, patient monitors, and oxygen concentrators, all designed with a focus on user comfort, safety, and performance. The facility combines advanced production technologies with skilled craftsmanship, and every device is built with care by a dedicated team—supporting healthcare professionals and patients in Japan and around the world.

Shiroi is also the hometown of Fukuda’s founders, Takashi and Tadashi Fukuda. The facility began operations in May 2025.
